Commercial advertising \$2.50 per square—10 lines nonpareil—per month.

Local reading notices 25 cents a line each week.

Cards of thanks 25 cents a line.

Entered at the Postoffice at Butte, Nevada, as second-class matter.

We regret to chronicle the death of a half-dozen or more dogs and several chickens by poison since our last issue, and we most keenly deplore our inability to announce the detection and conviction of the miscreant who is responsible for their taking off.—Times-Review.

If the Tuscarora editor lived in Tonopah he would head the above clipping thus: "Hailed with Joy." There are over 300 cur canines in this camp that are too lazy to rustle for refuse bones.

The Storey County Board of Equalization reduced the assessment of the Virginia & Truckee Railroad from \$10,000 to \$9,300 on the main track, and from \$2,500 to \$2,000 on side-tracks. The Truckee River General Electric Company asked a reduction of its assessment from \$55,000 to \$35,000, and threatens a lawsuit if the request is not granted. The application of the company was taken under advisement and refused.

A Colorado stock buyer is advertising for small mules. He should have no trouble in securing a few in this state judging from the efforts of several editors in trying to place the blame of the assassination of our beloved president upon Wm. Hearst, proprietor of the three great dailies. The Colorado mule buyer should come to this state and make his purchases.

The Reno Journal is becoming jealous of Tonopah's great richness, and would have its readers believe the Star mine's output is far ahead of the production here. But, Major, our smelter returns are cold facts, while your pencil returns go for naught. In the scale of public opinion your writing would have no weight.

Upon the news reaching Boston that the missionary, Miss Ellen Stone, who was captured by a band of Bulgarian brigands and taken into the mountains, was taken for the purpose of making her the chief robber's wife, 1500 Massachusetts girls made application to be sent out to Bulgaria as missionaries.

The BONANZA is in receipt of letters asking if this and that line of business is engaged in in Tonopah. All lines of business being transacted in this town can be found in the columns of this paper, and those not advertised do not exist here.

Every day sees the necessity of a telegraph or telephone line between this place and Sodaville. It is to be hoped that this crying need will shortly be built and our people placed in quick communication with the outside world.

The assessment roll of this County will be printed next week. The BONANZA is unable to give the increase of the assessment over last year, but it is believed it will be something over \$50,000.

A financial journal publishes rules for discovering counterfeit bank notes. What the average man wants is a few simple rules for discovering the article.

Since the founding of Tonopah the county has only been taxed \$68 for petty criminal cases. This is what law and order will accomplish with the right kind of citizens to sustain it.

The District Court has been in session during this week in Belmont. Only probate matters were disposed of.

Tuscarora has an officer who arrests persons for discharging firearms within the town limits.

Tonopah mines are the wonder of the mining world.

An Odious Comparison.

The Reno Journal, under the headline "Reno Star, Nevada's Heaviest Producer," publishes the following: "The Reno Star is now the biggest value producer in the State. None of the famous Tonopah mines can equal the production of this property, and even the Con. Cal. & Va. must yield the palm to it."

"Yesterday there was hoisted from the 100 foot level 101,000 pounds of ore. The cars were carefully sampled and the following assays were obtained: \$40, \$45, \$46, \$65, \$70, \$75, and \$81. This makes the value of the day's ore production over \$2000."

Reading the above is enough to make a Tonopah miner smile. The Journal is no doubt fully justified in praising the Reno Star mine, but it should be more careful in its comparisons, and thereby avoid making itself ridiculous. In production of pounds of ore per day the Reno Star may still be ahead of Tonopah, though that will not be for long. There is no comparison to be made, however, in the value of the ore per ton, or in the value of the daily output. There is one ledge in Tonopah that is producing over \$5000 worth of ore daily, and the daily production of the camp is over three times that of the Reno Star mine.

If the Tonopah mines did not produce ore of any greater value than the assays given by the Journal for Reno Star ore, there would be no Tonopah. Such ore in this camp is only available as waste for the building up of foundations for hoisting works on side hills, otherwise it has no value at present.

The Reno Star mine is no doubt all right, in its class, but it is not properly qualified to move in the society of the Comstocks, the Cripple Creeks, the Buttes, the Leadvilles, the United Verdes and the Tonopahs of the mining world.

To Advertise Our Resources.

A collection of choice specimens ores from the Tonopah mines is now being made by Maj. G. W. Ingalls of the Mining and Scientific Press. Many of the principal leases have already contributed to this collection, other, have agreed to do so. It is desirable that a good showing is made by the leasers of the Burro and Valley view as well as by those of the Mizpah ledge. Large photographs of the various properties will be given this collection and added to the one recently sent to the State Fair, all of this collection will be placed on public exhibition at Reno and Salt Lake City by Maj. Ingalls to advertise this camp. Let every citizen help make this effort a success. Send specimens this week to the BONANZA office where they will be properly labeled and packed.

A Lumber Famine.

There is no lumber for building purposes to be had in Tonopah. This has been the wall ever since the incipency of the camp. Winter is fast approaching and those intending to build are unable to do so on account of no available material with which to build. At least 600,000 feet of lumber can be used before Christmas for all purposes. Who will come to our rescue?

NEW TO-DAY.

M. A. Downey,

The CARSON

Furniture Man,

Opposite U. S. Mint.
